

Ironing Board SB13

INSTALLATION INSTRUCTIONS

Component Specifications
• Wall mount • Ironing board

07/2026 Item No. 161011
 • Check regularly to make sure the fasteners and wall mount are secure. • Do not overload the ironing board. • This product is intended for indoor use and should only be used as directed.

Installation

1.

Preparation - Make sure the wall is sturdy enough to support the weight and load of the ironing board when in use.
2.

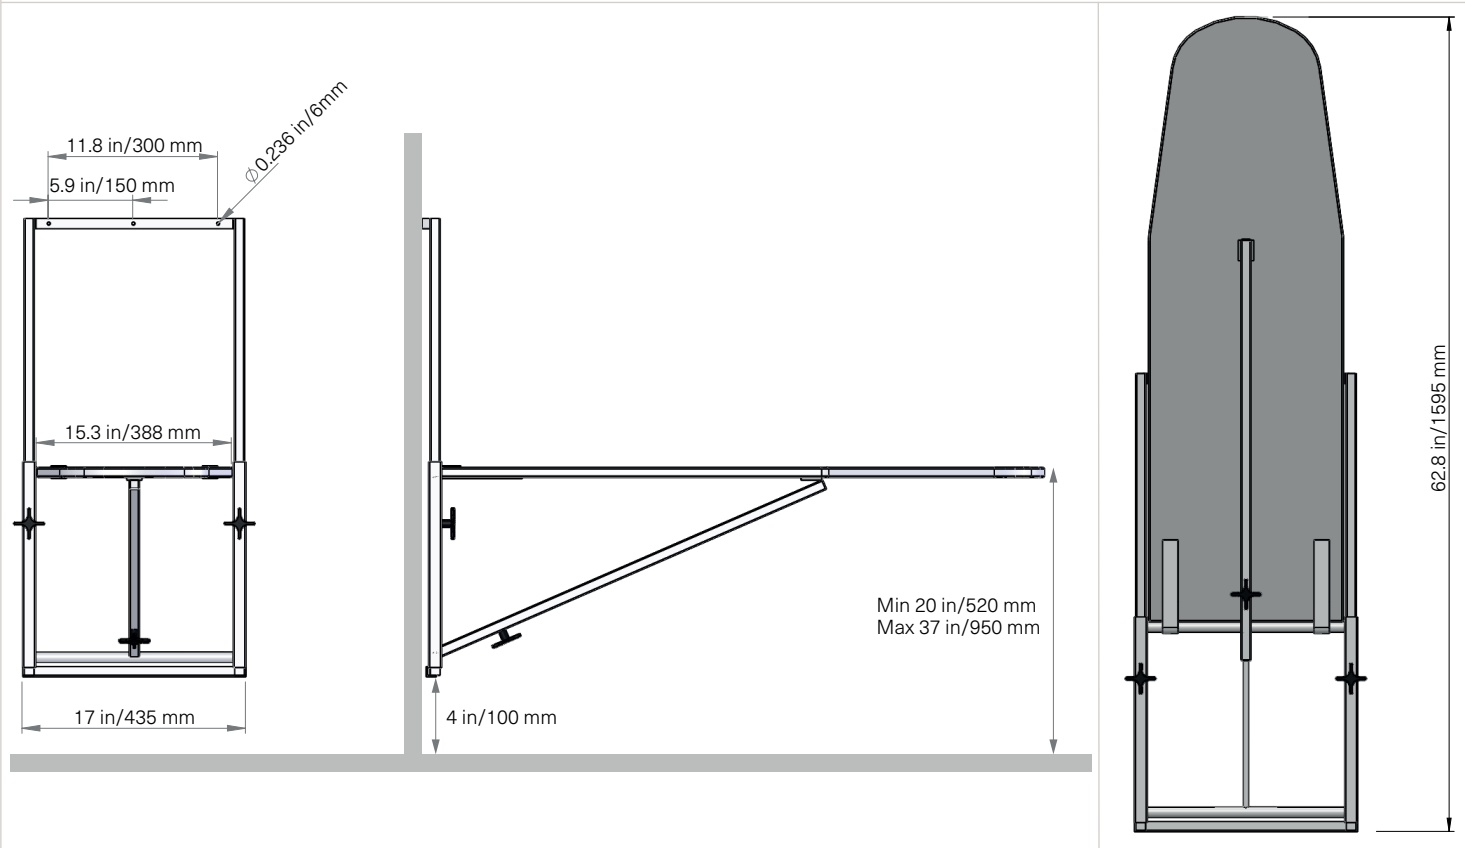

Measure and mark - Measure the height and position on the wall. Use a level to ensure that the ironing board is mounted straight. NOTE! Keep in mind that there needs to be free space above the wall mount for the ironing board when it is in the raised position.
3.

Drill holes - Drill holes according to the hole pattern on the ironing board's wall mount. Use a drill bit suitable for the wall material (concrete, brick, or drywall).
4.

Install the wall mount - Secure the ironing board to the wall using an expansion bolt, screw, and anchor suitable for the surface. Check that the mount is secure and stable.
5.

Check Functionality - Lower the ironing board by lifting the pin marked in red. Adjust the height using the two knobs. The recommended height from the floor to the top of the board when lowered is approximately 900 mm; adjust as needed.
6.

Raise the board and check that the pin locks automatically.

Care Instructions

- Clean the wall mount and frame with warm water, mild detergent, and a cloth. Remove any surface rust with a soft brush.
 - To clean the ironing board cover, first dust it with a soft microfiber cloth. Treat stains spot-by-spot with lukewarm water mixed
- with a little dish soap. Finally, wipe the entire surface with clean water and a cloth. NOTE! Wring out the cloth thoroughly. The cover should not get soaked through.
