

Drying equipment for fire and rescue services

PODAB offers customized drying solutions for protective gear, developed to ensure a gentle process that preserves both function and lifespan.

For protective
gear & station
wear

DRYING SOLUTIONS FOR A SAFER WORKPLACE

Specialized care for PPE & SCBA

PODAB's ProLine FC20 and TS63 E drying cabinets are specifically designed for protective gear, ensuring a safer working environment for firefighters and extending the lifespan of PPE and SCBA. The FC20 offers gentle inside-out drying, reducing wear and tear compared to traditional methods, while the TS63 provides a high-capacity solution that preserves the durability and performance of critical firefighting equipment.

Since the 1990s, PODAB has been pioneering the industry with advanced PPE drying cabinets, revolutionizing the drying process for heavy-duty garments. Our innovative hangers enable inside-out drying, while an advanced internal hot air distribution system ensures thorough drying on both the inside and outside. This groundbreaking approach maximizes efficiency and care, maintaining the integrity of protective suits and breathing apparatus.

At the core of our dedication is the ProLine FC20, which offers tailored drying programs designed specifically for firefighting gear. By combining precision engineering with cutting-edge drying techniques, we enhance firefighter safety and protect long-term investments in their equipment.

"ProLine FC20 was designed with intensive research, experienced engineers, and innovative solutions to create a safer workplace for our professionals." - Head of engineering and design

Optimized drying solution for SCBA and station wear

ProLine TS63 E

- Automatic & manual programs
- Preset start time
- Temperature & humidity tracking system
- Energy-efficient
- Electric heated air drying
- Hanging rail rotates out 180° and doors open 190°
- Gentle drying technology without mechanical action
- Double overheat protection
- Powder coated galvanized steel
- Program ends with `cool down` mode
- Interior lighting
- Sturdy construction ensures durability and reliability
- Versatile drying options for added convenience
- Ideal for delicate and hard to dry textiles and accessories

Main data	Imperial	Metric

limited warranty

Gentle drying technology

Utilizing a gentle drying process without mechanical action, making it perfect for delicate or hard to dry garments or accessories that should not be tumble dried. Eliminate any concerns regarding damaging your fabrics – the TS63 E drying cabinet offers a safe and effective alternative.

Optimal energy efficiency

The ProLine TS63 E is exceptionally energy-efficient, helping to reduce both costs and environmental impact. Its innovative design ensures optimal performance while minimizing energy consumption, making it a sustainable choice for any laundry operation.

Versatile drying options

A flexible drying cabinet that accommodates both station wear and accessories. A single bar and shelves enable efficient, gentle drying of all gear, regardless of shape or material. The shelves are perfect for safely drying items that cannot be hung.

Purpose-built design for protective gear

Heavy and hard-to-dry garments with padding and membranes dry efficiently thanks to the unique hanger design that directs warm air into the textiles. The cabinet can dry six full sets of turnout gear at once. By simply switching out a few hangers, it can also dry up to four complete PPE kits at the same time.

ProLine FC20

- Capacity, 6 complete PPE suits
- Automatic & manual programs
- Preset start time
- Temperature & humidity tracking system
- Energy-efficient
- Electric heated air drying
- Dual drying system for efficient and safe PPE drying
- Gentle drying without mechanical action
- Double overheat protection
- Powder coated galvanized steel
- Program ends with 'cool down' mode
- 6 slots for interchangeable hangers with integrated airflows
- Interior lighting
- Versatile hanging options for added convenience

Purpose-built design for protective gear

The ProLine FC20 drying cabinet is meticulously crafted to cater to the drying needs of PPE. Designed specifically for environments such as fire departments, military operations, and oil & gas industries, this cabinet is an indispensable tool for ensuring the longevity and effectiveness of essential gear.

Dual drying system for comprehensive moisture removal

The FC20 drying cabinet uses specially designed hangers to gently dry PPE from the inside and outside simultaneously without mechanical action. This reduces wear, boosts durability, and extends the life of protective gear in demanding conditions.

Impregnation and preserved functionality

The drying cabinet dries without mechanical action, which is gentle on garments and helps maintain their optimal functionality. The automatic programs include a unique reactivation phase that restores the impregnation during the drying of turnout gear, while also curing newly applied impregnation after washing.

SINGLE BAR

We offer the market's most **advanced technology** for gentle and efficient drying of turnout gear

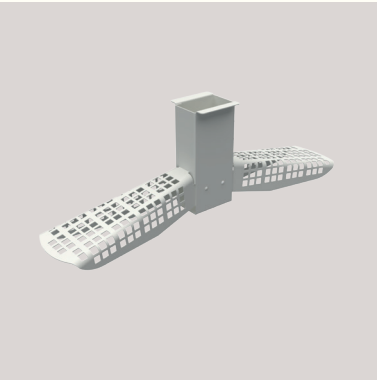

SHELVES

Complete your setup

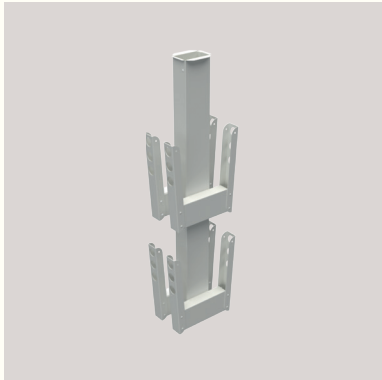

With the help of our accessories, such as laundry carts and specialized hangers, laundry handling becomes much easier and the working environment significantly improves. Below is a selection of our products. For more information about our complete range and accessories, visit www.podab.com.

FC20

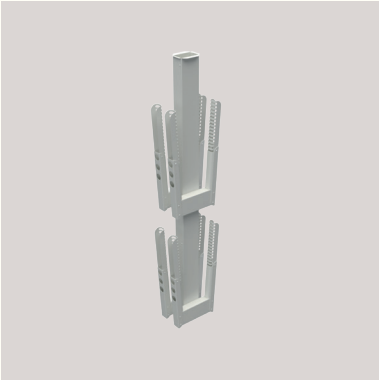

Hanger with integrated airflow

FC20

4 pair glove hanger with integrated airflow

FC20

4 pair boot hanger with integrated airflow

FC20

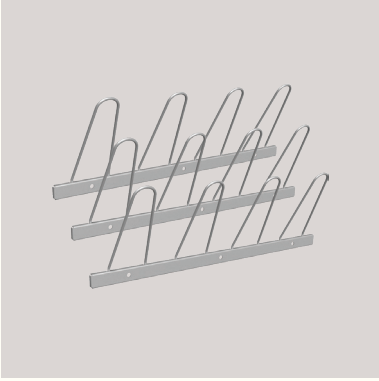

Extended base for extra hanging space

FC20

Loading rack on wheels with 6 hangers

FC20 & TS63

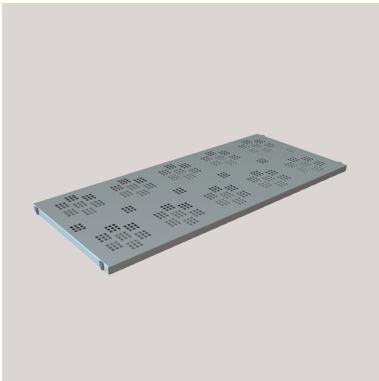

Door hooks for smaller accessories

TS63

Single bar for drying using regular hangers

TS63

Shelves for drying SCBA and accessories

Laundry cart

Flexible interior solutions for efficient and gentle drying of all gear

TS63

SWINGING HANGING RAIL WITH 53FT/16M TEXTILE HANGING LENGTH. IDEAL FOR STATION WEAR

SINGLE BAR FOR DRYING USING HANGERS

SHELVES FOR EFFICIENT DRYING OF ITEMS THAT CANNOT BE HUNG. CHOOSE BETWEEN 1-4 SHELVES TO MATCH YOUR DRYING NEEDS
